PROFESSIONAL SUMMARY

Director-level UX leader, research champion and user advocate with a track record of transforming teams into high-impact strategic partners. Known for strong cross-functional collaboration, leading through ambiguity and advancing research maturity.

"She gets it. She gets how to add value, how to lead effectively, how to collaborate effectively, and how to just be an awesome partner." — Peer feedback, 2025

"She's proven herself to be an expert in her space and has grown to be a leader that can manage navigating difficult business and team challenges. We have continued to increase the scope of Olivia's responsibility and she has not only handled it, but exceeded expectations along the way." — Performance review, 2024

Research Manager — *Shipt*

Aug 2019 - PRESENT

- Functioned as the highest-ranking UX research leader in the organization.
    - Reported directly to the Chief Product Officer in a strategic, autonomous role.
- Scaled the UX research team from 2 to 8 researchers, growing team expertise across qualitative and quantitative methodologies and career levels (Associate to Staff).
- Built and launched a two-track continuous (rolling) research program to support ad-hoc requests from Design, Product, and Marketing across all pillars.
- Conceived & spearheaded execution of a research repository which allows findings & recommendations to be linked to Epics, assigned to owners, and searched & filtered by date, lead researcher, topic, and more.
- Developed, iterated on, and oversaw the research intake and prioritization method, enabling the team to lead proactive, high-impact initiatives.
- Introduced a framework for tracking research impact & team output.
- Coached researchers to confidently present insights to stakeholders at all levels, including ICs, Directors, and the C-suite.
- Led multiple cross-functional research immersion trips with executive participation to deepen leadership's empathy and connection to user needs.
- Regularly presented findings in leadership forums, including quarterly business reviews, influencing product direction and decision-making.
- Mentored team members in presenting to executives, report and recommendation writing, balancing business and user goals, and leadership.

UX Researcher — *AnswerLab*

April 2018 - Aug 2019

- Clients included: Google, Amazon, Twitter, Facebook, Uber, Levi Strauss & Co., Farmers Insurance, Walmart
- Quickly identified key research objectives, seamlessly integrated into client product teams and delivered quality, impactful insights in a fast paced environment; collaborated with stakeholders to define research priorities; owned research execution and deliverables.
- Presented insights to clients spanning all levels.
- Highlights include moderating a public-facing panel discussion on emerging research methodologies, speaking on heuristic evaluations at AnswerLab's 2019 all-company Summit

- conducting ethnographies to uncover the impact of commute times, desk space, and environment on employee productivity and satisfaction.

UX Researcher — *Freelance, Microsoft, Ericsson*

May 2010 - Mar 2018

- Various responsibilities:
    - Managed 12 direct reports
    - Worked independently to create targeted research studies and all required materials, including recruitment emails, protocol, discussion guide, and participant materials
    - Planned, designed, and executed data collection and test protocols for lab and field work
    - Determined & implemented appropriate methodologies as needed
        - Usability testing, in-depth interviews, benchmarking, focus groups, playtesting, heuristic evaluations, competitive analysis, card sorts, and more
